Thomas Weisel Partners Group, Inc. Hosts Annual Technology & Telecom Conference

San Francisco, CA. February 9, 2009 – Thomas Weisel Partners (NASDAQ: TWPG), a global growth-focused investment bank, will host its Annual Technology & Telecom Conference, February 9 – 11, 2009 at the Fairmont Hotel in San Francisco. Institutional investors and company management will gather for this three-day conference, which will focus on opportunities and challenges in the technology and telecom sectors for 2009 and beyond. Over 225 companies representing applied technologies, communications equipment, computer systems and storage, electronic supply chain, information and financial technology services, semiconductors, software and telecom services, will be showcased at the conference.

“During the past year, we have continued to broaden and strengthen our coverage of the Technology and Telecom sectors. Although this current environment has been challenging for both companies and investors, we look for continued growth in technologies that improve utilization of existing infrastructure or outsourcing opportunities. Overall, we look for broad-based weakness in consumer tech spending, but for mobility-based technologies to capture an increasing share of consumer disposable income,” said Keith Gay, Head of TWP’s Research Group.

The conference will be led by Thomas Weisel Partners eleven senior research analysts: Blair Abernethy, CFA, software; Jim Breen, telecom services; Kevin Cassidy, semiconductors; David Grossman, information and financial technology services; Hasan Imam, communications equipment; Tim Klasell, software; Ajit Pai, applied technologies; Doug Reid, CFA, computer systems and storage; Tom Roderick, software, Matthew Sheerin, electronic supply chain; Tore Svanberg, semiconductors. Analysts will offer insight into the major trends impacting their respective sectors.
